Preval Funds SICAV - World Winners I, a Share Class of Preval Funds SICAV - World Winners

Management Company
ISIN

Preval
LU1132347094

Objectives and investment policy

This Equity Fund is actively managed aiming to outperform the return of the MSCI All Countries World Index (MSCI ACWI) benchmark. However, the Fund is index-unconstrained and is actively managed without following or tracking the above-mentioned index, which is only used for performance measurement purposes. The investment manager is not in any way constrained by the benchmark in its portfolio positioning, and the Fund will not hold all, or indeed may not hold any, of the benchmark constituents. The deviation from the benchmark may be complete or significant. The Fund mainly invests in international listed equities (60%-100%), either directly or through other funds (up to 10%) and without being limited to a specific geographic scope (including continental China and India) or industry sector. Investments will be primarily in companies with a market capitalization of at least EUR 1 billion or equivalent in other currencies.

Investments in continental China carry risks particular to this market and China-A Shares are invested through Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect. The Fund can use derivatives to protect against movements in currencies and security prices and for efficient portfolio management. Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within 5 years. The investor can buy or sell shares on a daily basis (Luxembourg bank business day). This Share Class does not make regular distributions. The Fund shall bear the costs of standard brokerage and bank charges incurred by the Fund through securities transactions in relation to the portfolio. These charges are not included in the 'Charges' section of this document.

Risk and reward profile

Risk profile

The Fund's risk and reward profile shows the variations in value an investment in this Fund would have undergone over the past five years, whereby simulated performance data is used in the case of missing history. The Fund's risk rating may change in the future. Please note, higher possible gains generally also mean higher possible losses. The lowest risk category does not mean that the Fund is risk free.

Why is the Fund in the specific category?

Amongst other, equity prices mainly reflect the expected prospects of firms, as estimated by market participants. Expectations tend to fluctuate more strongly in times of higher uncertainty. The Fund may have a low degree of issuer diversification which makes it more vulnerable.

Are there any other particular risks?

The Fund's risk and reward profile does not reflect the risk inherent in future circumstances that differ from what the Fund has experienced in the recent past. This includes the following events which are rare but can have a large impact.

- **Liquidity risk:** Assets cannot necessarily be sold at limited cost in an adequately short timeframe. Part of the Fund's investments may be prone to limited liquidity. The Fund will endeavor to mitigate this risk by various measures.
- **Counterparty risk:** Bankruptcy or insolvency of the Fund's derivative counterparties may lead to payment or delivery default. The Subfund will endeavor to mitigate this risk by the receipt of financial collateral given as guarantees.
- **Operational risk:** Deficient processes, technical failures or catastrophic events may cause losses.
- **Political and Legal risks:** Investments are exposed to changes of rules and standards applied by a specific country. This includes restrictions on currency convertibility, the imposing of taxes or controls on transactions, the limitations of property rights or other legal risks. Investments in less developed financial markets may expose the Fund to increased operational, legal and political risk.
