

WORLD WINNERS

July-18

Monthly Factsheet

Share Class I

World Winner invests in about fifty international market-leading companies with a contrarian investment approach.

FUND MANAGER'S COMMENTARY

For the month of July 2018, World Winners saw a -1.7% drop in value, under-performing its benchmark the MSCI World (€), which saw a positive performance of +2.8%.

The above-mentioned gap is the result of a strong performance in US equities (S&P +3.4% in €), which constitute 55% of our benchmark, and to which we are under-exposed (19% of World Winners) for valuation reasons (we believe they are over-valued). On the other hand, our high exposure to Chinese stocks (21.8% of World Winners), which represent a mere 6% of the MSCI World Index, penalized us in July amid escalating political tensions between US and China. An eventual trade war would impose tariffs on imported goods across a large spectrum of industries. We believe that the under-exposure of Chinese stocks in the MSCI is an aberration, as we know that China's GDP will exceed that of the US in the near future.

This performance gap between US and Chinese stocks is nothing new to us. It has actually always been there since the fund's inception. As a matter of fact, since April 4th 2015, the HSCFI (€) has dropped by -18.4% versus the SP500 (€) which increased by +29.7%. However, our relative under-exposure to US equities did not prevent World Winners from out-performing the MSCI since inception. To put things into perspective, World Winners rose +34.1% since April 4th 2015, versus +15.8% for the MSCI World (€).

Regarding Chinese stocks, we would like to remind you that we are mainly invested in domestic companies, which will not be affected by the potential US tariffs imposed. The market drop we saw lately seems excessive in our view, and we will take advantage of it to buy quality stocks at more attractive prices.

We wish you a pleasant summer end.
